## WORK EXPERIENCE

### DEVELOPMENT SPECIALIST

#### ( DIGITAL VENTURES COMPANY LIMITED )

I work at DV since October 2019 on a B2P project. B2P has been designed to boost efficiency at every step of the procurement process. The solution allows buyers, their suppliers, and banks to share Purchase Orders, Goods Receipts, and Invoices on a distributed ledger, based on agreed data protection policies, to enable automation of the entire procure-to-pay process.

#### MY ROLE AND RESPONSIBILITIES

- Review story and estimate complexity.
- Develop quality of code based on requirements.
- Develop customized components using in several projects.
- Research and POC solution using in front-end stacks.
- Code Reviewer and interviewer.

### SYSTEM ANALYST

#### ( TRUE MOVE H UNIVERSAL COMMUNICATION CO., LTD. )

I work with a team of 4 people since September 2018 on Smart UI project. Smart UI is the web application for using in True shops all over Thailand including dealer shop, telesales, support teams.

#### MY ROLE AND RESPONSIBILITIES

- Analyzing requirements and system flows from BA.
- Develop new features based on requirements.
- Develop front-end, connect RESTful services.
- Design test cases, unit test.
- Research the new technology to use in the project

### SOFTWARE DEVELOPER ( READYPLANET CO., LTD. )

I work with a team of 5 people since March 2016 on Shappy project. Shappy is the app that providing a lot of features such as chat, broadcast, points, member card, shop, gallery and more to SME and enterprise customers.

#### MY ROLE AND RESPONSIBILITIES

- Develop new features based on customer requirements.
- Develop a Library code using in the project.
- Research a limitation of technology that used in features.
- Research new technology that new features are required.
